United States Mint, Philadelphia, Penn.,

ASSAY DEPARTMENT,

February 10, 1890.

Hon. A. London Snowden

Superintendent &c. &c.

Sir

In reply to yours of this day, I think it will be advisable, in view of the error lately discovered, to make separate assays of the gold bars from the U. S. Assay office at New York. This kind of discrepancy has never occured before, and must have arisen from an accidental displacement of the bars before they were sent. But to be secure against any such occurrence, it will be best to assay every bar. — This of course will involve a little delay, as, ~~to~~ to a million of dollars there are say one hundred bars, making many more assays; but in a couple of days we can finish them. Meantime they can be reported instanter, on the N. Y. assays, as usual.

Very respectfully

W. E. Dubois

assayer
